**Symbols for the matrix of providing programmatic learning outcomes by the relevant components of the educational program:**

- – programmatic learning outcomes that are achieved;
- ОЗj – compulsory courses of general training of the curriculum of a specialty;
- ВЗj – disciplines of choice from the cycle of general preparation of the curriculum of a specialty;
- ОПj – compulsory disciplines of the cycle of professional training of the specialty curriculum;
- ВПj – discipline of choice from the cycle of professional training of the curriculum of a specialty;
- Зн – the serial number of the "knowledge" category in the list of programmatic learning outcomes in the program profile;
- Вм – serial number of the category of "skill" in the list of programmatic learning outcomes in the program profile;
- Комi – serial number of the category "communication" in the list of programmatic learning outcomes in the program profile;
- АiVi – the serial number of the category "autonomy and responsibility" in the list of programmatic learning outcomes in the program profile.

**II. Attestation**

Student attestation carried out by the examination commission after the completion of education at the educational level in order to establish the actual compliance of the level of training with the requirements of the educational program. A system of programmatic learning outcomes, defined in the educational curriculum of a specialist, provide for the student's certification. Form of attestation: qualification examination or get of the bachelor's thesis.

The qualifying work involves conducting analysis and theoretical development (simulation and research of processes and objects) of actual issues, problems in the relevant field of knowledge. The list of qualification papers for a specialty determine by the graduation department at the beginning of the academic year. The subject of

qualifying works should be directly relate to the generalized object of the activity of a specialist of the corresponding educational level. The list of themes approve by the order of the rector before the beginning of pedagogical practice. Students have the right to offer their own topic for qualification work.

The task of the qualification work should reflect all the production functions and typical tasks of the specialist's work and must timely brought to the student (before the beginning of the pedagogical practice).

Managers of qualification works can be professors, associate professors of the graduation department, as well as leading specialists of the manufacturing sector of the relevant branch.

Attestation of applicants for higher education of a bachelor's degree carried out by an examination commission, which may include representatives of employers and their associations, in accordance with the provisions of the examination committee, approved by the Academic Council of Rivne State Humanitarian University.

### **III. System of internal quality assurance of higher education**

The Rivne State Humanitarian University has a system for providing higher education institutions with quality of educational activity and quality of higher education (internal quality assurance system), which provides for the following procedures and measures:

- 1) definition of principles and procedures for ensuring the quality of higher education;
- 2) monitoring and periodic review of educational programs;
- 3) the annual assessment of higher education graduates, scientific and pedagogical and pedagogical staff of a higher educational institution, and regular publication of the results of such assessment on the official website of the higher educational institution, on information stands and in any other way;
- 4) ensure the professional development of pedagogical, scientific and scientific and pedagogical workers;
- 5) ensure the availability of the necessary resources for the organization of the educational process, including the independent work of students for each educational program;
- 6) ensure the availability of information systems for the effective management of the educational process;
- 7) ensure publicity of information about educational programs, degrees of higher education and qualifications;
- 8) ensure an effective system for preventing and detecting academic plagiarism in scientific works of higher education and higher education graduates;
- 9) and other procedures and activities.

The system of providing higher education institutions with the quality of educational activity and the quality of higher education, upon submission by the Rivne State Humanitarian University, can assessed by the National Agency for the Quality Assurance of Higher Education or independent institutions accredited by it. The

education system to determine whether it is consistent with requirements provision of quality education by the National Agency for the Quality Assurance of Higher Education, and international standards and guidelines for quality assurance.
