III The amount of ECTS credits needed to obtain a corresponding degree of higher education

The volume of the bachelor's educational program on the basis of complete secondary education with a term of education of 11 years is 240 ECTS credits, and on the basis of complete secondary education with a term of education of 12 years is 180-240 ECTS credits.

IV List of competencies of the graduate

Integral competence	Ability to solve complex specialized problems and practical problems in the field of development, education and upbringing of children of early and pre-school age or in the process of study, which involves the application of certain theories and methods of pedagogical science and is characterized by complexity and uncertainty of the conditions.
General competencies	1. Ability to productive (abstract, figurative, discursive, creative) thinking.
	2. Ability to independently search, process and analyze information from different sources, to the free use of means of modern information and communication technologies.
	3. Ability to identify, formulate and solve problems, make decisions and act in accordance with moral and ethical and legal norms.
	4. Ability to plan, make forecasts and predict the consequences of their actions and the project organization of activities, to ensure the safety of their own and other participants in the educational process.
	5. Ability to have free communication and cooperation in the state and native languages (verbally and in writing).
	6. Ability to create a team, motivate its members and achieve common goals.
Special (professional, substantive) competencies	1. Ability to develop in children of early and pre-school age basic qualities of the individual (arbitrariness, autonomy, creativity, initiative, freedom of behavior, self-awareness, self-esteem, self-esteem).
	2. Ability to develop children of early and preschool age as a means of communication and interaction with peers and adults, teaching children of early and preschool age in native and Ukrainian (state) languages.
	3. Ability to national-patriotic upbringing of children of early and preschool age (love to the Motherland, mother tongue, hometown, respect for state symbols of Ukraine). 4. Ability to form early and pre-school children the skills
	of safe and environmentally sound behavior and activities in everyday life, nature and the environment. 5. Ability to physical development of children of early and preschool age, correction and strengthening of their health by means of physical exercises and motor activity.

- 6. Ability to organize and guide the game (leading), artistic and speech and artistic-productive (pictorial, musical, theatrical) activity of children of early and preschool age.
- 7. Ability to individual and differentiated development of children of early and preschool age with special needs according to their possibilities (inclusive education).
- 8. Ability to determine logopedic diagnoses of children with disorders of psychophysical development.
- 9. The ability to correct certain disadvantages of physical and mental development of children to use non-traditional methods of work with children-logopaths, to organize speech-work in a preschool institution.

V. The normative content of the training of higher education graduates, formulated in terms of learning outcomes

Knowledge (Kn)

- 1. Basic knowledge of fundamental sciences, to the extent necessary for the development of professional disciplines.
- 2. Understand and define pedagogical conditions, regularities, principles, goals, tasks, content, organizational forms, methods and means of preschool education.
- 3. Understand, describe and analyze the phenomena of development, education and upbringing of children of early and preschool age using basic psychological and pedagogical concepts and categories.
- 4. Understand nature and know the age-old peculiarities of children with different levels of development in norm, peculiarities of gifted children development, individual differences of children with special needs.
- 5. Understand and define ways to use in the development, education and upbringing of children of early and pre-school age various types of activities (gaming, labor, educational, artistic, etc.).
- 6. To interpret the content and requirements of state documents and programs of preschool education, recommended by the Ministry of Education and Science of Ukraine, to choose adequate methods for their provision.
- 7. To understand the peculiarities of the application of the algorithm of professional actions for the organization of educational process with children of early and preschool age in the conditions of the DHS and the family.

- 8. Understand the peculiarities of working with parents and other subjects of the educational process.
- 9. Basic ideas about the planning of educational work, taking into account the age and individual abilities of children of early and pre-school age, children with special needs and make forecasts on its effectiveness.
- 10. Basic representations in the field of computer science and modern information technologies.
- 11. Basic ideas about the specifics of the system of education and education of children in different types of pre-school educational institutions.
- 12. Understand the peculiarity of the organization and application of scientific research methods in the field of pedagogy and psychology.
- 13. Features of development of children with psychophysical and speech disorders.
- 14. To know modern methods of diagnostics of physical, mental and speech development of children of preschool age.
- 15. Understand and define pedagogical conditions, laws, principles, goals, tasks, content, organizational forms, methods and means of special education.

Ability (Ab)

- 1. To analyze the pedagogical systems of the past and creatively transform their potential into the modern educational process of the DNZ.
- 2. To build a holistic educational process taking into account the basic laws of its course; to manage its quality, guided by the psychological and pedagogical principles of organization of educational process in the system of preschool education in the realization of the tasks of education, the goals of education and development of children of early and preschool age in the DHS and family.
- 3. Use skills and abilities to preserve and strengthen the psychophysical and social health of children.
- 4. To define tasks and contents of educational work with children of early and preschool age on the basis of the current programs of preschool education.
- 5. To carry out subject-subject interaction and developing interpersonal communication with children of preschool age and personal and socially oriented communication with parents.
- 6. To possess the technologies of developing a subject-gaming, natural-ecological, cognitive, and speech environment in different groups of early and

preschool age.

- 7. To apply the whole spectrum of psychological and pedagogical means for realization of tasks of national, spiritual, physical, moral, mental, legal, labor, ecological, economic, gender, sexual, intercultural, aesthetic education of children of early and preschool age.
- 8. To introduce modern development and information and communication technologies of education and training in the educational process of preschool educational institutions, to predict their educational effect and to evaluate the achieved results.
- 9. To obtain optimal methods and effective forms and various means of pedagogical influence on children in the process of their education, training and development, and in specific situations of subject-subject interaction of educator with children.
- 10. To carry out various types of planning in a preschool educational institution; to select the appropriate forms for plans for the implementation of the tasks of preschool education, and to draw up abstracts of various forms of educational activity taking into account age characteristics and individual differences of children, leading factors of development, basic principles of pre-school education and requirements for education and upbringing of children of early and preschool age.
- 11. To have technologies of preschool inclusive education; to be able to organize group and individual education and education of children with special needs.
- 12. To solve issues related to the complexity and organization of the activities of special educational institutions for children with speech disorders.
- 13. Organize and conduct psychological and pedagogical study of children with peculiarities of psychophysical development.
- 14. To supervise children with violations of psychophysical development, to plan and carry out corrective and development work with them on the basis of a differentiated and individual approach.
- 15. To cooperate with the parents of children with speech impairments or those who replace them, specialists of other branches (doctors, psychologists, teachers, educators), to promote social adaptation of

children	with	disorders	of	psychophysical
developr	nent.			

VI. Forms of certification of applicants for higher education

VI. FOI HIS OF CELUI	ication of applicants for higher education
Forms of certification	Certification can take the form of:
of applicants for higher	- public defense (demonstration) of qualification work;
education	- that / or certification exam (exams);
Requirements for	Qualification work on specialty 012 "Preschool education"
qualification work	may be performed by a bachelor's degree in the form of a
(in the presence)	thesis and defended during state certification instead of a
	qualification examination in accordance with the procedure
	established by the Regulations on the organization of
	educational process at Rivne State Humanitarian University.
	The list of diploma theses in the specialty is determined by
	the graduation department at the beginning of the academic
	year. Subject theses should be directly related to the general
	object of the activity of a specialist of the corresponding
	educational level. Students have the right to propose their
	own topic of thesis. Chiefs of theses may be professors,
	associate professors, senior lecturers of the graduate
	department, as well as leading specialists of the industrial
	sphere of the relevant branch. As a result of successful
	protection, the applicant may obtain from the examination
	committee a recommendation for admission to the
	magistracy for training in the educational-scientific program
	of the second (master's) level of higher education.
Requirements for	The qualification exam is a complex examination of the
attestation /	level of compliance of graduates with the educational
the only state	standard of specialty 012 "Preschool education" and
qualifying exam	includes questions on preschool pedagogy, preschool
(exams)	education methods, child psychology, as well as speech
(in the presence)	therapy and the clinic of intellectual disorders. Conducted in
	oral or written form.
Requirements for	The protection takes place as a public presentation of
