ОП_j - compulsory disciplines of the cycle of professional training of the specialty curriculum;

БП_j - discipline of choice from the cycle of professional training of the curriculum of a specialty;

3K_j - number of competencies in the list of general competencies of the program profile;

Symbols for the matrix of providing programmatic learning outcomes by the relevant components of the educational program:

• - programmatic learning outcomes that are achieved;

O3j - compulsory courses of general training of the curriculum of a specialty;

B3j - disciplines of choice from the cycle of general preparation of the curriculum of a specialty;

OПj - compulsory disciplines of the cycle of professional training of the specialty curriculum;

БПj - discipline of choice from the cycle of professional training of the curriculum of a specialty;

Зн - the serial number of the "knowledge" category in the list of programmatic learning outcomes in the program profile;

Вм - serial number of the category of "skill" in the list of programmatic learning outcomes in the program profile;

Комi - serial number of the category "communication" in the list of programmatic learning outcomes in the program profile;

АiVi is the serial number of the category "autonomy and responsibility" in the list of programmatic learning outcomes in the program profile.

II. Attestation

Student attestation is carried out by the examination commission after the completion of education at the educational level in order to establish the actual compliance of the level of training with the requirements of the educational program. A system of programmatic learning outcomes, defined in the educational curriculum of a specialist, is provided for the student's certification.

Form of attestation: qualification examination or defence of the thesis.

The qualification exam is a complex examination of the level of competence of graduates to the educational standard of specialty 012 "Preschool education" and includes questions on the technology of a modern elementary school lesson and technologies for studying educational branches in elementary school. It is conducted in oral or written form.

Qualification work on the specialty "Preschool education" may be pursued by a bachelor's degree in the form of a thesis and defended during state certification instead of a qualification examination in accordance with the procedure established by the Regulations on the organization of educational process at Rivne State Humanitarian University.

The list of diploma theses on the specialty is determined by the graduation department at the beginning of the academic year. Subject theses should be directly related to the general object of the activity of a specialist of the corresponding educational level. Students have the right to propose their own topic of theses. The assignment for the theses should reflect all the production functions and typical tasks of the specialist's activities and must be timely delivered to the student. Chiefs of theses may be professors, associate professors, senior lecturers of the graduate department, as well as leading specialists of the industrial sphere of the relevant branch.

The defence takes place as a public presentation of qualifying work, which may be attended by representatives of other educational institutions and / or employers.

As a result of successful protection, the applicant may obtain from the examination committee a recommendation for admission to the magistracy for training in the educational-scientific program of the second (master's) level of higher education.

III. System of internal quality assurance of higher education

The Rivne State Humanitarian University has a system for providing higher education institutions with quality of educational activity and quality of higher education (internal quality assurance system), which provides for the following procedures and measures:

- 1) definition of principles and procedures for ensuring the quality of higher education;
- 2) monitoring and periodic review of educational programs;
- 3) the annual assessment of higher education graduates, scientific and pedagogical and pedagogical staff of a higher educational institution, and regular

publication of the results of such assessments on the official website of the higher educational institution, on information stands and in any other way;

4) ensuring the professional development of pedagogical, scientific and scientific and pedagogical workers;

5) ensuring the availability of the necessary resources for the organization of the educational process, including the independent work of students for each educational program;

6) ensuring the availability of information systems for the effective management of the educational process;

7) ensuring publicity of information about educational programs, degrees of higher education and qualifications;

8) ensuring an effective system of preventing and detecting academic plagiarism in scientific works of higher education workers and higher education graduates;

9) other procedures and measures.

The system of providing higher education institutions with the quality of educational activity and the quality of higher education (the system of internal quality assurance) may, upon submission by the Rivne State Humanitarian University, be assessed by the National Agency for the Quality Assurance of Higher Education or independent institutions accredited by it, for the assessment and quality assurance of higher education on the subject of its compliance with the requirements systems of quality assurance in higher education, approved by the National Agency for the Quality Assurance of Higher Education, and international standards and guidelines for quality assurance.

Guarantor of the educational program,
project team leader

Associate Professor Pavlyuk T.O.
